

10 Reasons Why You Should Plant a Church

1. Australia needs Jesus and church planting is the most effective way to disciple a nation.
2. New churches tend to grow much faster than older churches.
3. Church planting gives opportunity for existing churches and Senior Ministers to expand their level of influence in their respective city, region, state or even across borders (utilising the Satellite Model).
4. New churches produce more ministry leaders (Acts 16:5).
5. Church planting can give meaning to your life by establishing something that has positive eternal consequences.
6. Church planting can target special groups in society that may not be reachable because of linguistic or cultural barriers that exist by default in our current style of churches.
7. Church planting enables you to release others into ministry and experience challenges that would not normally come their way if they were to stay on a ministry team.
8. Have an adventure, plant a church!
9. Leave a legacy behind, plant a church.
10. It aligns us with God's plan.
